

# Convertly

## Travel, Snap, Exchange

Taaibah, Anahat, Nicole, Raghad

# Inspiration

- This summer, we faced a common frustration while traveling: constantly switching between apps to convert currencies to CAD.
- Convertly: A seamless currency conversion app designed to streamline your travel experience.

# Program and Key Features

Convertly allows the user to:

- Snap a picture of their receipt for immediate currency conversion.
- Quickly convert currencies manually whenever you need.
- Access over 200 world currencies, with daily updates for accurate exchange rates.

**DEMO**

# Process and Technology Used

- Front End: Python (Streamlit)
- Backend: Open Exchange Rate API and Python

# ✕ Future Improvements

- Display all conversion rates
- Create a mobile app to be more accessible during travel
- Ensure camera is able to scan in various lighting

The background is a light cream color with large, soft, wavy shapes in a slightly darker cream tone. Scattered around the edges are various travel-related icons: a compass rose in the top left, a location pin in the top left, a map fragment in the top right, a location pin in the top right, a location pin in the bottom right, a globe icon in the bottom right, and a small circle in the bottom left. Dashed lines also meander across the background.

# THANK YOU!
